

SHASHANK PANDEY

Senior Software Engineer | React.js • Vue.js • JavaScript/TypeScript • MERN Stack

New Delhi, India | +91-9205225727 | shashank.041195@gmail.com | English, Hindi

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience building scalable, high-performance web applications using React.js, Vue.js, JavaScript (ES6+), TypeScript, and the MERN stack. Currently deliver enterprise frontend solutions for American Express (AMEX) as part of Coforge Ltd.'s engineering team. Skilled in leveraging AI-powered developer tools — GitHub Copilot, Claude, and ChatGPT — to accelerate development, automate testing, and improve code quality. Strong expertise in component architecture, state management (Redux, Redux Toolkit, Vuex), RESTful/GraphQL API integration, and performance optimization. Experienced leading frontend teams in Agile/Scrum environments across product and IT services companies.

CORE TECHNICAL SKILLS

- Frontend Development:** React.js, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Redux Toolkit, Vuex, React Hooks, Context API
- UI Libraries & Design:** Material-UI, Bootstrap, Tailwind CSS, Responsive Web Design, Micro Frontends, Progressive Web Apps (PWA), Web Accessibility (WCAG)
- Backend & Full-Stack:** Node.js, Express.js, MongoDB, MERN Stack, RESTful APIs, GraphQL, JSON, Ajax
- AI Developer Tools:** GitHub Copilot, Claude (Anthropic), ChatGPT, AI Pair Programming, Prompt Engineering, AI-Assisted Code Review & Test Generation
- Build, Testing & Performance:** Webpack, Babel, Jest, React Testing Library, npm/yarn, Code Splitting, Lazy Loading, CI/CD
- Tools & Methodologies:** Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Agile/Scrum, Test-Driven Development (TDD), Cross-Browser Compatibility, SEO Best Practices

PROFESSIONAL EXPERIENCE

Coforge Ltd. (Client: American Express — AMEX) | Noida, India

Jan 2025 – Present

Senior Software Engineer

- Develop and maintain enterprise-grade web applications for American Express (AMEX) using React.js, Vue.js, JavaScript, and TypeScript, supporting global travel and financial platforms.
- Leverage AI-powered developer tools, including GitHub Copilot and Claude, to accelerate feature development, automate unit test generation, and reduce code review turnaround time by 30%.
- Migrated legacy Vue 2 modules to Vue 3 Composition API, improving component reusability and reducing bundle size by 18%.
- Collaborate with cross-functional AMEX stakeholders, backend engineers, and QA teams in an Agile/Scrum environment to consistently deliver sprint commitments on schedule.
- Build and maintain reusable component libraries and design systems shared across multiple product teams, cutting development time for new features by 25%.
- Champion AI-assisted development practices within the team, training 5+ engineers on effective prompt engineering for code generation, debugging, and documentation.
- Integrate RESTful and GraphQL APIs to ensure secure, reliable data flow between frontend and backend services.

Smart Energy Water | Noida, India

Jan 2022 – Dec 2024

Product Engineer

- Led development and deployment of interactive monitoring applications using React, Redux, Webpack, and Material-UI, improving monitoring efficiency by 25% and reducing response time by 15%.
- Managed a team of 4–5 engineers, overseeing application architecture, code reviews, and delivery timelines.
- Implemented multilingual (i18n) support for international users, increasing user retention by 35% and reducing language-related support tickets by 20%.
- Optimized application performance through code splitting and lazy loading with Webpack, reducing page load time by 20%.
- Managed API integrations and data-flow architecture to ensure system stability and reliability.
- Conducted client demos and translated design mockups into production-ready, accessible UI components.

Freelance Frontend Developer | Remote

Aug 2020 – Jan 2022

- Delivered custom frontend solutions for independent clients using React.js, JavaScript, HTML5, and CSS3, managing the full project lifecycle from requirements gathering to deployment.
- Built a seamless, responsive user interface for an electric-scooter e-commerce storefront using React, integrating Maps API and geolocation features that reduced user friction by 20%.
- Coordinated directly with backend developers to integrate RESTful APIs, improving system stability and reliability by 5%.
- Managed client relationships end-to-end — gathering requirements, scoping timelines, and ensuring on-time delivery across multiple concurrent projects.

Capline Services Pvt. Ltd. | Noida, India

Jan 2020 – Aug 2020

Web Development Executive

- Built "Max Change," a community recycling platform using React and Node.js, increasing community participation by 25% and diverting 1,000+ tons of waste annually.
- Streamlined pickup route planning using efficient algorithms and geolocation technology, cutting route time by 30%.
- Performed cross-browser testing and debugging to ensure consistent functionality and performance across devices.

PROJECTS

- **Show Time — React Web App:** Built with React and Material-UI; features include a search bar, pagination, reusable components, menus, routing, and performance optimizations; data fetched via Axios/Fetch. Live: itshowtime.netlify.app
- **Shopping List — React Web App:** Full CRUD shopping list application with mouse and keyboard support; fully responsive UI built with React and Material-UI icons. Live: my-shoppinglist.netlify.app
- **Other Projects:** Calculator, React Covid Tracker, Find My Number (game), Animated Thermometer, Temperature Converter, personal portfolio websites.

EDUCATION

- **Master of Computer Applications (MCA), Information Technology** — Guru Gobind Singh Indraprastha University, New Delhi | 2017 – 2020
- **Bachelor of Computer Applications (BCA), Information Technology** — Guru Gobind Singh Indraprastha University, New Delhi | 2013 – 2016

CERTIFICATIONS

- **React and Redux** — SoloLearn
- **JavaScript** — SoloLearn
- **HTML5** — SoloLearn
